**DETAILED ACTION**

***Response to Amendment***

1. The 08/01/2002 amendment has been entered. Claims 1-19 were cancelled and new claims 20-38 were added.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 20-38 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The newly added claims are not supported by the originally filed specification for the following reasons.

Claims 20-24 and 28:

These claims are not supported by the originally filed specification because a "low allowable error threshold" and a "higher allowable error threshold" was not described in the originally filed specification. Applicant's specification at page 8 line 14 to page 9 line 2 describes using a more powerful FEC for foveated layer 12 and a weaker FEC for the background layer 14 but does not describe an "error threshold".

Art Unit: 2672

Claims 25-38:

These claims are not supported by the originally filed specification because the decoding and correcting in claim 25 at lines 19-24 were not described by the originally filed specification. Applicants specification at page 9 lines 9-16 and page 13 lines 10-15 describes the process performed by the receiving device but it does not describe that which is claimed in the decoding and correcting steps of claims 25-38.

Claim 35:

This claim is not supported by the originally filed specification because the claimed "transmitting a return error signal for changing the foveation point" was not described by the originally filed specification. Applicant's specification at page 9 line 17 to page 10 line 11, page 12 line 15 to page 13 line 2 and page 13 lines 10-15 describes requesting retransmissions but did not describe "transmitting a return error signal for changing the foveation point".

Claim 37:

This claim is not supported by the originally filed specification because the claimed transmitting of the second encoded signal before the first encoded signal was not described by the originally filed specification. Applicant's specification at page 12 lines 18-21 applicant described transmitting of the first encoded signal before the second encoded signal.

Art Unit: 2672

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
